In re Patent Application of

Confirmation No.: 7418

Frank Henglein, *et al.*

Date: June 21, 2010

Serial No.: 10/580,120

Group Art Unit: 1793

Filed: September 11, 2006

Examiner: Pegah Parvini

For: EFFECT PIGMENTS HAVING AN ALUMINUM OR ALUMINUM ALLOY CORE,
PROCESS FOR THE PRODUCTION THEREOF AND USE THEREOF

VIA EFS-WEB

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

APPLICANT'S STATEMENT OF SUBSTANCE OF INTERVIEW

Sir:

The Examiner's Interview Summary mailed May 24, 2010 is noted.

The undersigned agrees with the Summary of the Interview provided by the Examiner except for one clarification. The Examiner has stated: "Applicants' representative, further, indicated that although the specification of instant application disclose Reisser (EP 0848735) in their disclosure, coating layers onto the pigment of Reisser is not safe due to a highly exothermic reaction".

To clarify, the point made was that the combination set forth in claim 1, namely, a metal chalcogenide layer that produces a color flop over a pigment such as the one disclosed by Reisser was thought to be unsafe (not that it is not safe, or that it cannot be rendered safe). Thus, a skilled person would not have coated such a pigment with a metal chalcogenide layer.

THIS CORRESPONDENCE IS BEING
